WHO WE ARE

GTC Productions LLC is a fiber optic subcontractor founded in 2022 and headquartered in Orlando, Florida. We support telecom prime contractors, ISPs, broadband builders, commercial fiber projects and data center infrastructure programs. **We travel for the work and scale crews to what the job needs.**

Our team of meticulous splicers and wire management technicians build for first-time acceptance. We understand the importance of timely and accurate documentation and have the systems in place to provide it at the rate and speed you need.

WHAT WE SPECIALIZE IN

Fiber Splicing

New build, maintenance, restoration and upgrade

High Count / Ribbon

BBF and central offices

GPON / FTTH

Splitters, distribution and drop work

Data Center Fiber

Runs, terminations, testing, documentation

Wire Management

Dressing, routing and labeling done right

CORE CAPABILITIES

- Fiber splicing for construction, maintenance, restoration, upgrade and new build projects
- High count fiber and ribbon splicing
- Splice closure installation, restoration, dressing, labeling and documentation
- Hub, cabinet, handhole, vault and CO related fiber work
- Data center and commercial fiber infrastructure, including runs, terminations, testing and documentation
- GPON, FTTH and FTTx field support, including splitter work
- OTDR, OLT, light level and continuity testing
- Fiber troubleshooting, outage support, damage restoration and emergency response
- Fiber pulls, terminations and structured cabling support when included in project scope
- Field photos, test records, labels, redlines and job documentation as required by scope

COVERAGE & CAPACITY

- Orlando based. We travel for the work.
- Crews scale to the size of the job
- Subcontract support, overflow capacity and production construction support
- Restoration response and maintenance programs

BEST FIT CUSTOMERS

- Telecom prime contractors needing dependable subcontractor capacity
- Data centers and critical facilities
- Regional ISPs and broadband operators
- General contractors with commercial or infrastructure fiber scopes
- Low voltage and structured cabling firms needing fiber specific crews

EXPERIENCE

GTC has supported fiber work connected to major telecom, broadband and data center programs, including workstreams associated with **Gigapower, Bluestreak, MasTec, ADB, FiberNow, and Lambert's Cable / Dycom.**

Data center reference: data center fiber work at HostDime in Orlando for Gigapower.

DOCUMENTATION & COMPLIANCE

Available on request or as part of a vendor onboarding packet: signed W-9, general liability certificate, workers compensation certificate, commercial auto certificate, and umbrella / excess certificate where applicable. Updated certificates can be issued with the customer listed as certificate holder. Pricing, availability and final scope commitments are confirmed by Gabriel Torres before work is accepted.
